Architectural Barriers

Rule: 68.52 – Request for Inspection

TDLR has deleted the requirement for a Request for Inspection (RFI) Form from Architectural Barriers Rule 68.52. However, RAS Procedure III. A) has not been updated or modified. While the owner is not required by AB Rule to submit an RFI form to the RAS, the RAS is required to obtain a completed RFI form from the owner or designated agent prior to performing an inspection per RAS Procedures. The RFI form must be included in the project file and must accompany the Project File Request form.
