TM 03-01

Dressing and Fitting Rooms

TAS 4.1.3(21) requires dressing and fitting rooms to comply with TAS 4.35. It is often assumed that the scoping application is limited to single occupant dressing rooms provided in department stores and medical facilities; however, there are other spaces where occupants are expected to dress or change clothes (i.e. multi-occupant locker rooms in schools and health clubs). As a point of clarification, locker rooms or any other space where the occupants are expected to dress or change clothes must comply with TAS 4.35.
